ENHANCED SECURITY
PROTECTION

AceDoors DURADOORS™ are a top quality, high performance metal door.

Standard features of the AceDoors DURADOOR™ include a unique door chamber that locks the door into the outside channel, resulting in a strong, yet lightweight door, with a light impact-resistant surface.

Our serial number system ensures individual door specifications are recorded to assist with inspection and maintenance throughout the working life of the door.

FEATURES

- Designed to be installed into pre-cast concrete, timber, block work, insulated panel or long run roofing walls.
- Eliminates all swelling, sticking and painting problems associated with timber doors.
- Powder coated aluminium finish, to colour match building appearance. No onsite painting needed.
- Pre-hung in one piece frame with your choice of hardware fitted.
- Optional extras include: door closer, anti-jemmy strip, kick plates, push plates, vision panel, air vents, louvres and hard point for panic bars and/or mag lock.
- Energy saving polyurethane foam core is used to deliver exceptional insulation values.
- Full perimeter gasket seal to decrease energy costs and reduce air infiltration.
- Lightweight, high performance construction.
- Can be supplied as single or double leaf doors.
- Very hygienic and able to be used in high wash down areas, totally warp & rot free.
- Competitively priced against timber.
